

Dear Customer:

We are proud to announce that Café Terruno has been BASC certified by the Business Alliance for Secure Commerce, which is a business-customs partnership created to promote safe international trade.

This certification guarantees global supply chain security standards and procedures, in partnership with businesses, governments, customs, law enforcement agencies and international business organizations.

Being a BASC certified company ensures secure international trading and prevents merchandise smuggling, customs fraud, terrorism, illicit narcotic trade and the use of chemical substances used in the production of narcotics.

At Café Terruno we strive to look for ways in which to improve our business practices. We are sure this new certification will facilitate the trade between us in an efficient and secure manner. If you have any comments or questions please do not hesitate to contact our office at (506) 2232-0291
