

Friday August 8th, 2008.

Dear Customers,

We are proud to announce that Café Terruño has joined the CarbonFree™ program by Carbonfund.org in order to reduce and offset the CO2 emissions causing climate change. Cafe Terruño has committed to support carbon offset projects such as energy efficiency and reforestation to zero-out our carbon footprint. Each project plays an important role in the fight against global warming.

Our first contribution will be for the project of Return to Forest in Rivas, Nicaragua. Return to Forest will reforest an area in Nicaragua larger than Central Park and will sequester 150,000 metric tons of carbon dioxide emissions. Carbonfund.org helped develop the project in partnership with Paso Pacifico, a nonprofit dedicated to preserving and restoring Central America's tropical forests.

For future information on our upcoming projects towards fighting global warming please visit our website: [www.cafeterruno.com](http://www.cafeterruno.com).

If you have any comment or question please do not hesitate to contact our office at (506) 2232-0291.
